

News from Gyrus Systems

We at Gyrus Systems are excited about a recent change in our company ownership and want to share our good news with you, our customers and prospective customers. Effective this month, we are now under new ownership and will be led by our new CEO and President, Viren Kapadia.

Armed with over 18 years of technology leadership experience, Mr. Kapadia is a driven leader with proven results in general management, strategic marketing, and operational skills in global markets. While serving as Vice President and CIO of Hilb Rogal & Hobbs, Mr. Kapadia introduced technical innovations while focusing new processes on improving customer service. Prior to that, Mr. Kapadia spent ten years at General Electric/Genworth Financial in software development and IT leadership positions directing strategic planning and facilitating the growth of multiple global markets. By leveraging his knowledge with the expertise of the Gyrus team, we are confident that we can provide our customers with even greater service and product value.

As always, our customers will remain our main focus. Mr. Kapadia declared that his “first priority is to protect Gyrus' best asset; the customers who got us where we are and placed us in a position where we could serve a larger market.” Mr. Kapadia is “eager to learn more about our customers and the individuals that use Training Wizard and GyrusAim.” “By interacting with our foundation of customers,” he says, “I am confident that we can propel Gyrus to an even higher level of excellence and incorporate our expertise with the growing needs of workforce and talent management.” That same sentiment is echoed by the rest of the Gyrus team. We are excited by this new addition and the vision he aims to bring to Gyrus products and services. As we move forward, our emphasis will be on enhancing our products and building our offerings to meet and exceed customer expectations.

We understand your needs and we will help you achieve your goals.
