

Simplify. Enable. Innovate

GOVERNMENT

GyrusAim and Government:

Our learning management systems provide government employees with the tools to help manage their career development and give employees the tools needed to assist with an agency's development and advancement. Gyrus Systems offer solutions for government agencies that help raise workforce productivity, improve employee retention, aid regulatory compliance, cut expenses and reduce training time.

In current times it is absolutely critical for government agencies and organizations to respond quickly to constant challenges and to be trained and competent in order to face them.

How can GyrusAim help your government agents?

- Access to web-based training from anywhere.
- Translatable pages
- Assessments readily available to test their knowledge and abilities.
- Ability to see what skills they have yet to acquire through a Skills Transcript.
- Access to their training history via Training Transcripts.

How about your Training Administrators?

- Track an agents or employees training history and certifications
- Stay compliant with government regulations
- Send mass email reminders
- Enroll or waitlist agents or employees into needed courses
- Archive agent or employees and access their records whenever necessary

Why Gyrus Systems?

Our government clients expect nothing but the best and we strive to deliver that. We understand the difficulties in dealing with the proceedings that go along with acquiring a vendor and maintaining a relationship with that vendor, therefore we are proud to be a General Services Administration (GSA) vendor.

Our federal, state, and local government clients are guaranteed the lowest rate available. We have over a dozen government clients and are familiar with their individual training and compliance needs. Our LMS also caters to non-GSA government clients. Because of our experience with the Government, we understand their needs in safety, security, and training.

Key benefits for Government Organizations:

- No negotiations necessary as the prices are already set and approved
- Reduce admin efforts and quicker turnarounds
- Peace of mind knowing that you are buying from a government approved vendor
- Individual Development Plans

Key GyrusAim success areas:

- Save money by reducing training time and increasing productivity
- Aiding in regulatory compliance
- Supply management and administrators with the tools they need to be successful

Gyrus Government clients include:

- DCITA
- NOAA
- New Mexico Department of Transportation
- Federal Bureau of Investigation
