

Simplify. Enable. Innovate

NON-PROFIT

GyrusAim and the Non-Profit:

Non-Profit organizations have a great need for maximum work output, with minimal time spent by employees inputting the information, and Gyrus has a solution to provide that. Because a non-profit retains its earnings for its offered services and programs, it is important that they have the reliable and cost efficient GyrusAim LMS, to help them get the most for their investment.

How can GyrusAim help your volunteers and employees?

- Students and volunteers can see what they need to meet compliance requirements.
- Can see their own Individual Development Plans and their training progress.
- Students can waitlist or enroll into specific classes.
- Students can see what classes they need to complete or have completed through their Individual Development Plans.
- Students can view their training transcripts.
- Students can complete evaluations upon completion of courses that can be converted into reports.

How about your Training Administrators?

- View and print reports for their employees showing training progress and training needs.
- Manage your organizations training and development by scheduling, enrolling, and automatic email.
- Assess the students knowledge with built in assessments.

Why Gyrus Systems?

At Gyrus Systems we strive to provide a system to allow our clients to administer better training services to their learners to help them meet the ever changing industry standards and needs.

We understand how important it is for non-profit professionals to be well trained and knowledgeable, and our goal is to assist them in continually growing and improving their skills and knowledge.

With efficient training and a successful Learning Management System, we help non-profit organizations achieve their goals and initiatives as well as achieve successful and effective training on a limited budget.

Key benefits for Non-Profit organizations:

- Low cost installation and licensing
- Employees can minimize their work load
- Tracking training is easy and takes seconds

Key GyrusAim success areas:

- Effective internal training management
- Ensuring accountability for results
- Performance monitoring of organizations and students
