# SERVICE & TECHNOLOGY

## **GyrusAim and the Service & Technology Sector:**

*In the Services and Technologies industry the development and knowledge of your people are vital to your success. In an industry with a dynamic workforce, GyrusAim is necessary for driving the growth, knowledge and success of not just your employees, but your customers as well. Our LMS provide customers in this highly competitive industry faster and less expensive ways of transferring knowledge, competencies, proficiency and experience throughout a globally dispersed group of employees while ensuring compliance with new and existing regulations.*

### *How can GyrusAim help your employees?*

- Ability to take assessments to prove that they have acquired certain skills.
- Can view Gap Analysis to compare current title to other and see what skills must be obtained in order to qualify for that position.
- View their Skills Transcript in order to keep track of skills that need to be obtained.
- Track their individual certifications and assessments.

### *How about your Training Administrators?*

- View and print reports for their employees showing training progress and training needs.
- Manage and adhere to compliances via certifications and assessments.
- Easily Avoid risks of non-compliance with training transcripts and certification email reminders.
- View employees Individual Development Plan.
