

Simplify. Enable. Innovate

UTILITIES

GyrusAim and the Utilities Sector:

The utilities industry includes companies that generate, transmit, and distribute electrical power, distribute natural gas, treat and distribute fresh water, and treat wastewater. These services employ a significant number of workers to handle the individual jobs and those workers must be well trained in order to satisfactorily complete their duties. GyrusAim is the tool that will not only help train these employees to be successful, but also keep them compliant and up to date with industry standards.

How can GyrusAim help your employees?

- Ability to take assessments to prove that they have acquired certain skills.
- Can see their own Individual Development Plans and their training progress.
- View their Skills Transcript in order to keep track of skills that need to be obtained.
- Track their individual certifications and assessments.

How about your Training Administrators?

- View and print reports for their employees showing training progress and training needs.
- Keep track of employees throughout the world by viewing their Individual Development Plans on demand.
- Easily Avoid risks of non-compliance with training transcripts and certification email reminders.
- Manage and adhere to compliances via certifications and assessments.

Why Gyrus Systems?
